

## MedEvac4 Folding Stretcher

**A**TRUNIM<sup>®</sup>

CE

Available colors:

The MedEvac 4 combat stretcher is the ultimate rescue stretcher for the combat medic core. Folds in four, light weight with extremely high tensile strength. Able to deploy quickly and efficiently on the battlefield.

### Super Compact

The Med Evac4 is a lightweight folding stretcher that folds into four segments. Only 20.8" (52cm) when folded, it is short enough to fit comfortably on your back, while not protruding above shoulder level. It allows for complete freedom of motion - helmets won't knock into it even if when the neck twists. No worries about getting hung up on low openings or presenting a high profile target to enemy fire; as long as the shoulders are out of sight, the Med Evac4 is out of sight.

### Lightweight

The MedEvac4 weights only 6.1kg (13.42lbs). It opens fast and easily (within 6 seconds). Just snap it open and its

patented joint configuration automatically locks in place. No need to waste precious seconds fiddling with locking mechanisms as with other folding stretchers. Once it opens, it stays open - no chance of accidents - the automatic locking joints guarantee it. Refolding is just as fast - only seven seconds.

## Not just for military

All the characteristics that make the MedEvac4 the ideal battlefield stretcher also make it perfect for a wide range of civilian rescue and evacuation operations. Fire fighting, helicopter evacuation, ski patrol, wilderness expeditions, camping, etc. The MedEvac4 is the best stretcher for the job; lightweight, portable, easy to use and reliable. The MedEvac4 tactical stretcher is the best stretcher for the job; lightweight, portable, easy to use and reliable.

## Rugged and reliable simplicity

The MedEvac4's revolutionary joint configuration eliminates the need for springs and complicated locking mechanisms. With only 3 folding joints on either side, the MedEvac4 opens and closes using natural motions. It doesn't take a genius to use the MedEvac4, only to design it. The poles are tested to take 570Kgs of stress without signs of material fatigue.

## Easy transportation and storage

The MedEvac4's small folded volume and light weight means more beds can be stowed in tight places. That's important in evacuation carriers such as helicopters, where space and weight is at a premium.

Accessories	
Tactical IV Pole	For supporting an IV (Intravenous) drip
Tactical Litter Stand	For elevation of the patient on Stretcher to waist height. Elevation allows Doctors, Combat Medics and Medical Personnel to examine the patient and conduct triage without squatting or kneeling down. May also assist in field surgeries.
MedEvac4 Backpack	Designed for the combat medic to carry 1 X MedEvac4 Tactical Stretcher, 1 X Tactical IV pole and Medical supplies. Compartmentalized for easy access of medical supplies.
Stretcher Backrest	Stretcher Backrest is designed for MedEvac4 Tactical Stretcher to assist the patient to rest at 45 or 90 degrees.
Stretcher Wheel Cart/Wheeled Litter Carrier	Stretcher Wheel Cart/Wheeled Litter Carrier is a foldable, lightweight casualty transport system that allows one person to transport a casualty strapped to a stretcher. It can also act as a litter stand in the battlefield or medical stations, as it elevates the patient on the stretcher to waist height.
Gryphon Litter Carrying Harness	The Gryphon® Harness allows 2 soldiers to carry a patient on a stretcher, while maintaining their ability to point their weapon forward.
MedEvac 4 Carrier	The MedEvac4 Carrier is designed as a simple backpack for our MedEvac4 Tactical Stretcher, as well as compatible 4 folding models.
MedEvac 4 Bag	The MedEvac4 Bag is designed as a simple carry bag for our MedEvac4 Tactical Stretcher.
Detachable Wheel for Stretchers	Detachable Wheel is designed and developed to reduce load on Stretcher Bearers. It allows one person to transport a patient strapped onto a Stretcher.

\*Specifications are subject to change without prior notice.

The MedEvac4 Tactical Stretcher is built using ALTRUNIUM® - an extremely stable molecular structure formulated by our team of experienced metallurgist.

## MedEvac4 Folding Stretcher – Accessories

Altrunium® Reinforced Ring

IV pole Attachments, 6 points per stretcher  
Compatible with our Tactical IV Pole

Altrunium® Leg Crossbar with Strap support  
to prevent unintentional collapsing on impact.
